Rubber moulds for Compound Wall

We proudly present our new range of Rubber Moulds . We introduce Rubber Moulds for compound wall/fence/panels .We are here to give new definition for compound walls with astonishing designs which are never seen before. Concrete panels/walls which are vibroformed on Rubber Moulds gives them unmatching beauty, glazing, strength. With rubber moulds designer compound walls/fences can be casted with ease .

Features:

Easy to cast compound walls
Easy to demould
Easy installation
High stregnth concrete panels can be casted
Astonishing designs possible
Rubber moulds when vibroformed gives the panels glazing and high aesthetic appeal
Can be casted even in small factory setup
The color and design is inbuilt.
Panels are ready-to-install after production in factory itself.
